

NEWS RELEASE

FOR IMMEDIATE RELEASE: June 7, 2019

**GUNNISON AND SLATE RIVER CLOSURES
High, Fast Water Prompts Sheriff to Issue Order**

Gunnison County, Colo – Effective June 7, 2019 and until further notice, the Gunnison River is CLOSED between Almont and the Gunnison Whitewater Park; and the Slate River is CLOSED between Gunsight Pass Ridge and the State Hwy 135 bridge at mile marker 25.5. By Order of the Gunnison County Sheriff (per authority of Colorado Revised Statute 33-13-111), these river portions are CLOSED to all water vessels. These closures are to protect public safety, and are due to dangerous river conditions, including very low clearances at bridges. For more information, contact the Gunnison County Sheriff's Office 970-641-1113.

All Other Rivers and Streams: For all other areas not identified above, please be aware that all rivers and streams in Gunnison County continue to run at bank-full conditions. All recreational users (boaters, fishermen, etc.) are urged to use extreme caution on and around the rivers. The rivers are fast, cold and carrying large amounts of debris. There could be numerous snags and debris jams, resulting in serious obstacles, as well as low clearances on bridges. Due to the volume of water being carried, the character of these rivers and streams is far different and more dangerous than during normal flows.

Do not allow unsupervised children or pets close to these rivers and streams. All persons on or near these rivers should be wearing appropriate personal floatation devices (PFD's).

Beginner boaters and floaters are strongly advised to employ a professional rafting company if entering the water.

Boating equipment lost on/in the river should be reported to Dispatch at (970) 641-8200.

For more information, please contact the Gunnison County Sheriff's Office at (970) 641-1113.
