

## UPPER GUNNISON RIVER RESTORATION PROJECT (2021)

AUGUST 2021- The Upper Gunnison River Water Conservancy District (District) recently began the *Upper Gunnison River Restoration Project (2021)*. This multi-beneficial water resource improvement project will eliminate the gravel channel push-up dam for the Outcalt No. 2 diversion, improve irrigation infrastructure and create a more natural hydrologic system on the Gunnison River just upstream of County Road 10. In addition, it will improve the fishery in this area.

It is anticipated that the project will be completed around the end of September. Please be aware that equipment will be used in and around the river and a temporary coffer dam will be constructed. **Boaters should stay “river right” in this area and take extra precaution in the construction area.** If you have questions, please contact the District at (970)641-6065.
